Additional Information

Software Development / Consulting

Agency Attachments (see [below](#) to locate) includes a template Statement of Work to be used if ESRI is engaged to develop software or otherwise create or modify intellectual property. Agencies planning such engagements should also be sure to read the “Custom Software...Addendum”. This type of work is typically based on a number of pre-existing components to which ESRI will grant the agency a license at no charge. In return, the agency agrees to grant ESRI a license to use the deliverables produced for the Agency.

Executive Department Agencies should be aware that there could potentially be accessibility issues relative to software development projects. If so, ESRI will advise you prior to preparing a proposal scope of work.

Also note that the Agency may not offer to hire ESRI employees who work under a Statement of Work, during its term and for a period of one year thereafter. There are substantial financial penalties for making such an offer. See Article 13 of the “Custom Software...Addendum.”

Training

Training classes, both at your site and at ESRI’s regional office in Danvers, as well as “Virtual Campus” classes are included in the ITS48designatedITD. Review the “Training Terms and Conditions” document found under [Agency Attachments](#).

Vendor List and Contract information

Contact your ESRI sales representative (see below under Contractor Information) for a quote; be sure to identify yourself as employed by a government agency (state, regional, local, etc.). ESRI will then provide a price quote from the price list that was negotiated for ITS48designatedITD. Use the quote to obtain a purchase order.

Note that when making ESRI software purchases; be sure to plan for future maintenance costs.
